

ADOPTION OF AI WITHIN THE HEALTHCARE INDUSTRY

80% of HCPs are
willing to adopt AI into their
day-to-day practice.

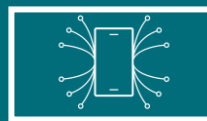

HOWEVER

41% think patients
will be willing to adopt AI into
their therapy journey.

Key areas where HCPs expect AI to be the MOST relevant to their role

Diagnostic and Triage
Assistance

Digitalisation and Quick
Access to Information

Remote Patient
Management

Cost-effectiveness and
Reducing Workload

Efficiency and Time
Management

Enhancing Decision-
Making

Screening and Imaging
Analysis

Patient Education

Key areas where HCPs expect AI to be the LEAST relevant to their role

Complex Human Interaction
and Communication

Clinical Examination of
Patients

Moral and Ethical Issues

Patient Trust and
Acceptance

Patient Feedback and
Personal Care

Experience and
Outcomes of Care

What do HCPs
need to further
embrace the
change?

Evidence-based effectiveness in admin,
patient outcomes and workflows

Intuitiveness and user-friendly
interfaces

Education and training on AI
